Addendum No. One (1)

Safety Mesh Screening Procurement Project

November 20, 2026

From: Auglaize County Commissioners
209 S. Blackhoof Street, Room 201
Wapakoneta, OH 45895

To: **All Bidders of Record**

This Addendum is hereby made a part of the contract documents and specifications of the above referenced project. All other requirements of the original specification shall remain in effect in their respective order. Acknowledgement of this addendum by inserting its number and date in the proposal form.

1- Questions and Answers

END of ADDENDUM NO. ONE (1)

1. **QUESTION:** Kane's specified “S-V12-24S-Z” code versus the manufacturer's publicly listed “S-V12-Z”: is the suffix a project-specific model, and are there approved fabrication/shop drawings, installation details, frame mounting requirements, and existing-unit matching criteria available for bidders?

   ANSWER: In the “S-V12-24S-Z" code, the 24S is a quarter inch woven rod infill. It is the size of the bars going across the panels. The S-V12-Z is the basic manufacturer code. Any available fabrication/shop drawings, installation details, frame mounting requirements, and existing unit matching criteria are within the posted Bid Specifications and this Addendum No. One. Bidders are encouraged to conduct an onsite inspection of the project site and existing installed materials and may schedule visits through the Auglaize County Sherriff’s department by contacting Denise Barlage at 419-739-6565 or email dbarlage@auglaizecounty.org. All pre-bid inspections must be completed no later than five (5) days prior to the bid opening. .

2. **QUESTION:** The specified 12-gauge stock-length channel/angle/cover-plate perimeter fittings do not have separate quantities or lengths. Does the County expect the manufacturer to calculate a full kit from the listed panels, and can it share field measurements/details? Are anchors/fasteners/unloading equipment included in procurement scope?

   ANSWER: Bidders are responsible for taking measurements and determining calculations. Field measurements and details may be obtained by the bidder from their onsite review of the work area. Anchors/fasteners/unloading equipment are to be included in the scope of the bid specifications. The intent of the Procurement project is to have all material available onsite and ready for installation through the Installation project.

3. QUESTION: For procurement only, does Section D.5 require the full-amount bid/contract bond or alternatively 10% certified check/cashier's check/letter of credit as written? Is there a different treatment of the contract bond after award or any other material-supplier eligibility requirement?

   ANSWER: Yes, the required full-amount bid/contract bond or alternative 10% certified check/cashier’s check/letter of credit as written is required. There will not be any additional requirement after award; the bidding on the project will be your confirmed acknowledgement of material-supplier eligibility.

4. QUESTION: Do the specified workers' compensation, general liability, automobile limits and confined-space provisions all apply to a bidder whose manufacturer ships directly to the jail but whose company does no installation? Are material-only insurance certificate requirements or approved direct-ship arrangements different?

   ANSWER: A bidder not performing any work, and submitting for product procurement only, can provide material-only insurance certificates instead.

5. Question: The bid form on page 21 calls this a 'demolition project' and mentions labor/equipment even though it is labeled 'Safety Mesh Screening Procurement'. Should bidders use it as supplied, or is a corrected County form forthcoming?

   ANSWER: This is a clerical error on our part, but not one that we view as material given the overall bid packet. Bidders should use the form as originally provided.

6. QUESTION: How are permitted partial payments under ORC 153.13 administered for factory-fabricated materials, and at which delivery/acceptance milestones? We are not requesting an advance payment without authorization.

   ANSWER: We will process full payment upon receipt of the product and invoice from the bid awarded contractor.

7. QUESTION: What are the site-visit access arrangements, questions deadline, and addendum/approved-equal approval process? The Notice says site inspections must occur at least five days before opening?

   ANSWER: The bid deadline is 10:15a.m. December 3, 2026 which places the access deadline five days prior to, or by 10:15a.m. November 28, 2026.
