<u>Item</u>	<u>Price per gallon</u>	<u>Recommended Application Rate (gal/ sq. yd.)</u>
SS-1H (diluted 50%)	Delivered	
Alternate:	Delivered	
Demurrage rate	\$ _____ per hour	

Past performance of supplier will be considered when Bituminous material is purchased by Auglaize County Engineer

Bituminous Material Bid Specifications

Material Testing:

The Auglaize County Engineer or his representative reserves the right to draw samples from all materials listed and supplied as a part of this bid document. The testing will be performed by an independent testing laboratory and all costs incurred shall be the responsibility of the Auglaize County Engineer. All samples will be taken at the project site and will be held for future reference and/or verification. The supplier may draw their own sample at the same time for comparison, but that sample shall be the responsibility of the supplier's representative.

Asphalt Concrete:

- All materials and mix designs shall be in accordance with Section 301 & Section 441, ODOT Construction and Materials Specifications dated January 1, 2023.
- A JMF shall be submitted for each mix design and plant location(s) quoted as a part of this bid document.

Liquid Asphalt Emulsion:

- Supply a technical data sheet showing the min/max test results for all products quoted as a part of this bid document. Standard tests shall be performed under specifications shown in AASHTO M316.
- The supplier shall provide the Auglaize County Engineer with QA/QC testing results in a timely manner for every 15,000 gallons of material supplied to Auglaize County.
- A comparison between the supplied technical data sheet, testing results performed by the Auglaize County Engineer as mentioned above and the supplier's QA/QC results will be the basis for acceptable materials. The Auglaize County Engineer reserves the right to reject substandard materials based on this comparison. Previous test results of a material and supplier will be considered when liquid asphalt emulsion is purchased.
- Demurrage will not begin for at least two (2) hours after arrival time. The demurrage rate thereafter shall be listed on the bid document.
- Some full loads of material may be billed directly to Townships at the order of the Auglaize County Engineer or his representative

Fog Seal:

- Supply a technical data sheet showing the min/max test results for all products quoted as a part of this bid document. Standard tests shall be performed under specifications shown in AASHTO M316.
- Residue by distillation, as tested per AASHTO T59, shall not be less than 30%.
- The supplier's recommended application rate shall be listed on the bid document as gallons per square yard.
- The supplier shall provide the Auglaize County Engineer with QA/QC testing results in a timely manner for every 15,000 gallons of material supplied to Auglaize County.
- A comparison between the supplied technical data sheet, testing results performed by the Auglaize County Engineer as mentioned above and the supplier's QA/QC results will be the basis for acceptable materials. The Auglaize County Engineer reserves the right to reject substandard materials based on this comparison. Previous test results of a material and supplier will be considered when fog seal is purchased.
- Demurrage will not begin for at least two (2) hours after arrival time. The demurrage rate thereafter shall be listed on the bid document.
- Some full loads of material may be billed directly to Townships at the order of the Auglaize County Engineer or his representative.
