- For Verification Acceptance, the contractor shall pull a separate 10,000 gram sample any time Quality Control samples are pulled to match the 403 sampling specifications. All samples taken will be marked with all information needed for comparison checks by the County. These samples will be tested, randomly and at the County's discretion for comparison by an approved laboratory using the same methods listed in ODOT CMS 403.
- The Contractor shall supply the appropriate asphalt sample, paper work, test results etc. necessary to allow the independent laboratory to accurately run and compare the test results.
- The contractor shall notify the County any time samples are pulled to coordinate sample pickup.
- All costs associated with independent testing for verification acceptance will be the responsibility of the County.
- Testing not in agreement will be investigated.

The County reserves the right to employ an independent inspector to monitor the Contractor's laboratory, equipment, test methods, procedures etc.

Asphalt samples may be taken by the County from the on-site paving application. Any testing on these samples is the discretion of the County but shall be performed by an approved laboratory. All costs of testing shall be the responsibility of the County. All batch slips from the plant shall show the percent of AC asphalt contained in said load with all weight to be in "English" units (tons).

Payment:

Payments shall be based upon the average of the contractor's quality control samples compared to the County's Verification Acceptance samples using the pay factors as detailed below in the "**Pay Scale Table**" Section of these specifications. The Contractor shall be paid 100% of all work performed after test results of the asphalt samples have been compared, verified, and accepted.

All billing for resurfacing of county roadways shall be directed to the Auglaize County Engineer for processing. All invoices shall contain the exact quantities of materials placed for each individual roadway and sent to the Auglaize County Engineer.

Based upon existing revenue account balances at the time of request for payment, Auglaize County has the right to defer final payments until December 15, 2025.

Pay Scale Table:

The following chart will be used by the County in determining said pay factors for bitumen content (+0.2% greater than the 441 job mix formula) based on the average of test results as stated above.

Pay Factor	Deviation of the Mean for Bitumen Content			
	1 Test	2 Test	3 Test	4 Test
1.00	± 0.70	± 0.47	± 0.36	± 0.30

0.85	± 0.91-1.00	± 0.62-0.68	± 0.49-0.54	± 0.41-0.45
0.70	± 1.01-1.10	± 0.69-0.75	± 0.55-0.59	± 0.46-0.50

Additional Notes

The extra cost per ton for a "scratch course" shall be applied to any one mile section of roadway receiving less than 200 tons.

The County Engineer shall be notified of the scheduling of the resurfacing one week prior to the beginning of work. The County Engineer or his designated representative (inspector) at the job site will instruct the contractor to either add or delete tonnage on a particular section of roadway due to the existing profile.

The entire width of the pavement shall be cleaned with power-operated brooms before resurfacing. No rubber-tired rollers shall be used in either "knock-down" or finish rolling.

No intersections are to be resurfaced unless the roadway being resurfaced is the "through" road. Special care shall be taken at the "through" intersections to ensure a smooth transition onto the intersecting roads.

The contractor will be required to seal all feathered joints with AC20.

Only County and State roadways are to be utilized as haul roads. Township Roads can only be utilized by trucks when empty and returning to the plant.

All work performed by the Contractor shall be subject to the administration of Section 4115 of the Ohio Revised Code (prevailing wages).

All existing concrete or asphalt driveways entering the proposed roadways are to be "feathered" to meet road grades at a distance not to exceed three feet from the edge of the pavement unless otherwise directed by the engineer or township trustees. Only existing asphalt mailbox approaches shall be resurfaced unless otherwise directed by the County Engineer. The County Engineer shall advise the Contractor of any bridge decks not to be resurfaced, prior to the paving of the roadway (see itemized specifications).

Class II temporary centerline is to be the placement of 4" wide by 12" long yellow tape at 25' intervals. The tape shall be the quality typically used for temporary centerline. Temporary centerline is to be in place at the completion of each days resurfacing. A quantity is figured for both intermediate course and surface course locations.

The County Engineer shall provide risers for all of the surveying monument boxes located on the roadways to be resurfaced. It shall be the responsibility of the Contractor to install said risers to grade at the time of the resurfacing. A map of the locations of the boxes will be provided.
